Hello team,

I am working on (student)'s SST referral and so far have noted the following concerns. I was wondering if you could go through them and see if I am missing any specific concern for referral.

**Primary Concern (Academic and/or Behavioral):**

(Student) demonstrates the following concerning behavior:

- Short attention span, difficulty focusing
- Work/task completion (Only 10 - 30% complete)
- Poor organization Skills
- Easily distracted, daydreams
- Poor peer relations
- Uncommunicative

(Student) also has huge academic concerns - teachers report that she has

- Difficulty completing her work.
- Performance is below her ability level.
- Struggles processing academic ideas and concepts as well as applying her knowledge to complete her work.
- Poor comprehension and computational skills.

Thank you!

Dhara

She has been trying a lot harder in the past few weeks in science, but even with the effort still lacks higher scores on tests and quizzes. Thank you, H v 7th Grade Science

Hi Dhara, The list captures pretty much everything. One other thing that I could add is that she is very shy and doesn't speak up and it's very uncomfortable for her to share things out loud. She is more comfortable one-on-one, not as a group. Thank you, A

Thanks for your quick feedback. We are presenting her on May 12th. If you could share some of her work sample to highlight these concerns that would be great. Along with a copy of an average peer's work. Regards, Dhara
